

Company Profile TOPAS GmbH

Since nearly three decades the name Topas stands for high-quality products and innovative efforts in the field of particle, aerosol, and filter testing technology- *developed, designed and made in Germany*. Both domestic customers and customers abroad have taken benefit from our ideas and experiences as a developer and manufacturer of equipment for generation, measurement and dilution of airborne particles [aerosols] and complex test systems for various air filters, filter media and separators. The Topas company customer philosophy enables a fast response to changes on the current market and the realisation of customer demands. The own research and development as well as a close cooperation with universities and research institutions has steadily expanded the company know-how which leads to ongoing new solutions for Topas customers. Keeping close contact to market demands Topas has been widening its product range over the years and continuously focuses its efforts on product optimisation and quality improvement.

TOPAS COMPETENCIES

- Generation [i.e. Aerosol Generation from Powders or Liquids]
 - ✓ <https://www.topas-gmbh.de/en/produkte/rupe/aerosol-generation-from-solid-particles/>
 - ✓ <https://www.topas-gmbh.de/en/produkte/rupe/aerosol-generation-from-liquids/>
- Conditioning [i.e. Aerosol Dilution Neutralisation]
 - ✓ <https://www.topas-gmbh.de/en/produkte/rupe/aerosol-accessories-conditioning-sampling/>
- Measurement [i.e. Measuring of Particle Size and Concentration, Pore Size Measurement,]
 - ✓ <https://www.topas-gmbh.de/en/produkte/rupe/particle-measurement/>
 - ✓ <https://www.topas-gmbh.de/en/produkte/rupe/pore-size-measurement/>
